SUMMARY

Versatile Full Stack Developer and Data Scientist with extensive experience in designing and implementing scalable web and mobile applications. Proven track record in leveraging software development lifecycle and cloud technologies to improve operational efficiency and compliance. Skilled in AI development, CI/CD pipelines, and agile methodologies, with a strong focus on delivering high-quality, user-centric solutions.

Full Stack Development
Frontend Development

Data Science
Backend Development

EXPERIENCE

Software Developer / Scotia Bank – Toronto, ON

2026 - Present

- **Lead team** of developers to deliver **high-quality code** through **technical mentorship** and coaching.
- **Establish coding standards** and **best practices** to maintain **software quality** across the organization.
- **Architect** and **develop enterprise-grade applications** using **ReactJS, NodeJS, and JavaScript**.
- **Collaborate** with architects, business analysts, and developers to **design and test complex software solutions**.
- **Partner** with **delivery leads** to **define project scope, estimate efforts, and manage timelines** for multiple assignments.
- Conduct **rigorous code reviews** and **unit testing** to ensure adherence to **secure coding practices**.
- **Solve technical blockers** by **coordinating** with **cross-functional teams** and **stakeholders**.

Senior Full Stack Developer / RBC Royal Bank – Toronto, ON

2021 – 2025

- Led **platform development** of a critical web application using React, **Node.js, and Python (Flask)**, enhancing operational efficiency by 30%.
- Designed and optimized automated **data pipelines and offline processes** for Fed report generation leveraging **Python, SQL, Apache Spark, Kafka, Airflow** and **Hive**, improving compliance accuracy.
- Developed robust **RESTful Web APIs** and managed application state with Redux; demonstrated deep understanding of **distributed systems and microservice architecture**.
- Managed development workflows via **Jira** and collaborated with stakeholders, increasing project delivery predictability by 60%.
- Streamlined **DevOps scripting and CI/CD pipelines** using GitHub, Jenkins, UCD, and Helios and **Docker** accelerating deployment frequency by 50% with comprehensive unit testing, crucial for **platform scaling**.

- Developed responsive web and mobile applications using **React JS, Node JS, Redux, React Native, C#** and **.Net framework** with interactive UI prototypes crafted in **Lucidchart and Figma**.
- Applied advanced knowledge of data structures, algorithms, relational and non-relational databases for efficient **API** integration and testing with **Jest** and Puppeteer.
- Built, tested, and deployed microservices and CI/CD pipelines on **Azure** for multiple projects.
- Improved page load speed by 75% through **performance optimization** and **code refactoring**.
- Collaborated in **agile teams** to prioritize feature development for maximum impact.

Data Scientist Summer Student / RBC Royal Bank – Toronto, ON

2019 - 2019

- Developed full-stack web applications using **JavaScript frameworks** to **process, analyze, and visually render data**.
- Integrated backend data flows with REST APIs and JSON for dynamic data visualization.
- Increased efficiency by 15% through creation of a web-based executive-facing application for metrics reporting.

Software Developer / eClinicalWorks India Pvt Ltd – Ahmedabad

2015 - 2018

- Developed and maintained mobile applications serving over 35,000 users.
- Participated in the full Software Development Life Cycle (SDLC), including design, development, automated testing, and deployment.
- Enhanced code quality and accuracy by 10% through pair programming, design patterns, and best practices.
- Conducted user interface testing, debugging, and prepared technical documentation for completed projects.

EDUCATION

Cloud Computing for Big Data Bachelor of Engineering, Information Technology	Lambton College – Toronto Gujarat Technological University
---	---

SKILLS

Programming Languages: Java, Python, JavaScript, TypeScript
Logs and Security Scanning: ArgoCD, Dynatrace, Splunk, Black Duck, Aqua Scan, Checkmark, Fortify
Frontend: React, Material UI, Redux, HTML, CSS, Jest
Backend & APIs: Node.js, Express, Flask, REST API, GraphQL
Mobile Development: Android Studio, Android SDK, React Native
Cloud & DevOps: Azure, AWS, CI/CD (Git, GitHub, Bitbucket, Jenkins, UCD, Helios, DAG), ACCP Pipelines
Databases & Caching: SQL, MySQL, Hive, Elasticsearch, Redis
Tools & Methodologies: Visual Studio, Github Copilot, Jupyter Notebook, MS Office, Scrum, Jira, Figma, Lucidchart
